

# The fish fauna of reef, seagrass and sand habitats in the Jurien Bay Marine Park

David Fairclough, Alexia Bivoltsis, Ian Potter and Russ Babcock

- How do the compositions of fish species differ among habitats and marine park zones? A study using complementary sampling methods (underwater visual census, baited remote underwater video, trawling and seine netting).
- Are “no fishing” zones useful for managing the stocks of the silver trevally *Pseudocaranx georgianus*? An acoustic tagging study.
