**Name: Ben French**

**Affiliation: Murdoch University**

**Newsflash title: Determination of the diets of Snapper and Silver Trevally and construction of a food web for the demersal fish community in South-western Australia**

# “Determination of the diets of Snapper and Silver Trevally and construction of a food web for the demersal fish community in South-western Australia”

Prof Ian Potter, Ben French

**Murdoch**  
UNIVERSITY

-Snapper and Silver Trevally diets remain unstudied.

-Subject to increasing fishing pressure

- Understanding the diets of these species is crucial for developing a demersal food web for the south-western coast.

-Ecosystem models using these food webs allows effective management strategies to sustain these species within the context of EBFM
