

Marine Science in WA 2010 Show-&-Tell

Name: Oliver Berry

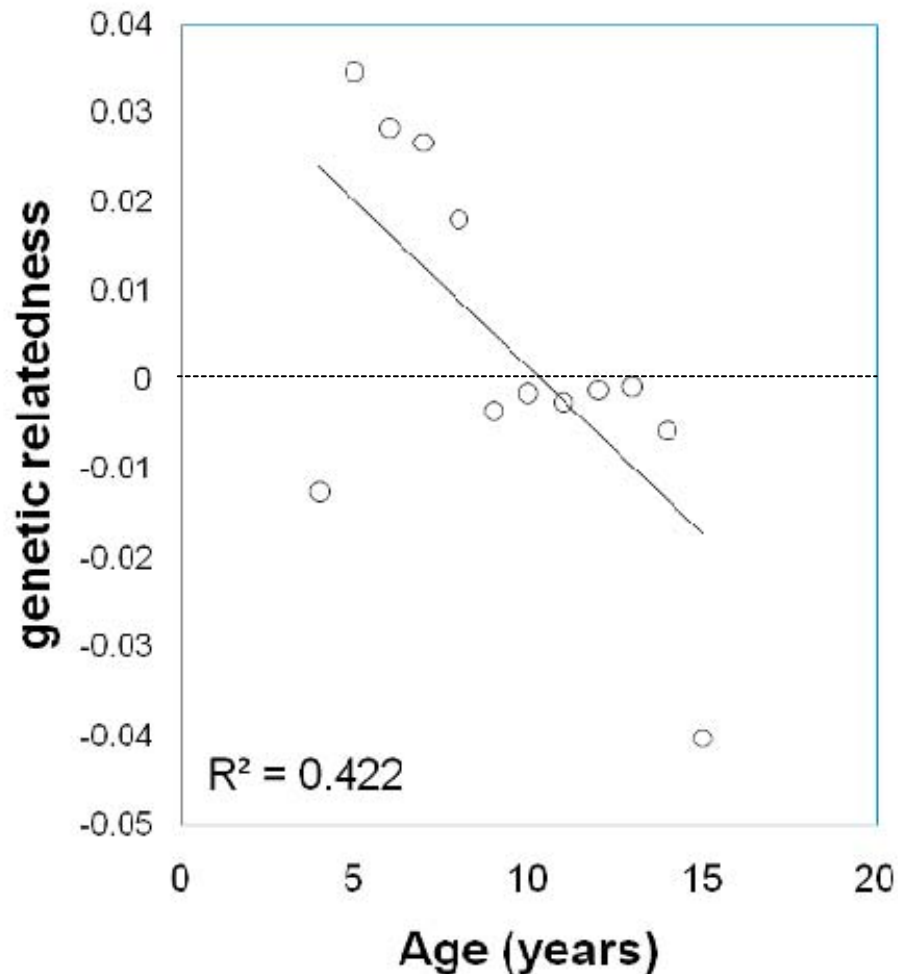

Affiliation: CSIRO Marine and Atmospheric Research

Collaborators: Phillip England (CSIRO Marine and Atmospheric Research), Ross Marriot (Department of Fisheries, WA), Rangelands NRM WA, WAMSI

Newsflash title: Insights into larval and adult dispersal of spangled emperor from combined genetic and hydrodynamic analysis

Insights into larval and adult dispersal of spangled emperor from combined genetic and hydrodynamic analysis

Hydrodynamics:

- *extensive larval dispersal*

Genetics:

- one genetic stock – *confirms hydrodynamics*

But,

- *larvae stick together during dispersal*
- *Adults disperse little*
