

Marine Science in WA 2010 Show-&-Tell

Name: Michael Tuffin

Affiliation: Department of Fisheries, WA

Newsflash title: Remote activity monitoring and assessments

REMOTE ACTIVITY MONITORING & ASSESSMENTS

Using remote survey methods to determine total activity at access points to areas of interest for accurate assessment of fishing effort...

aerial photo: property of State of Western Australia / Landgate

- Remote survey methods since 2005 include:
 - Video camera
 - Vehicle counter
 - Photo snapshot
 - Ticketing
- Results can be used for:
 - Accurate temporal distributions and estimates of effort
 - Improving estimate accuracy in related integrated surveys
 - Research development design tool for other surveys
 - Business planning support tool
